

# State of South Carolina - COVID-19 Grant Management Services

Senate Finance  
Committee  
Handout

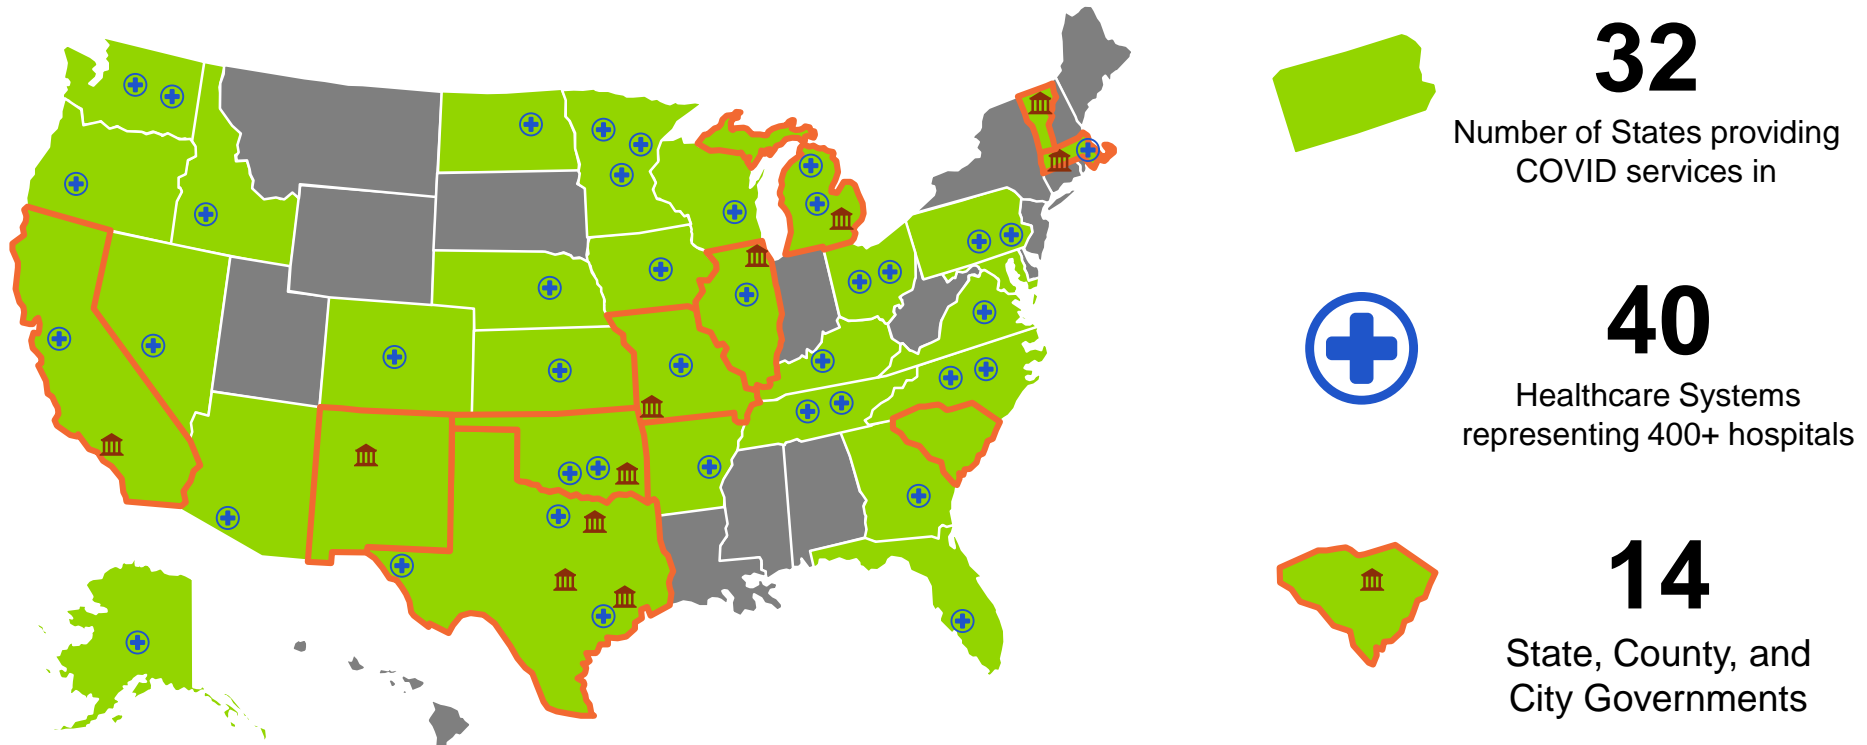

June 16<sup>th</sup> 2020

# Guidehouse's Current COVID-19 Experience

Bringing perspectives from across the country to South Carolina

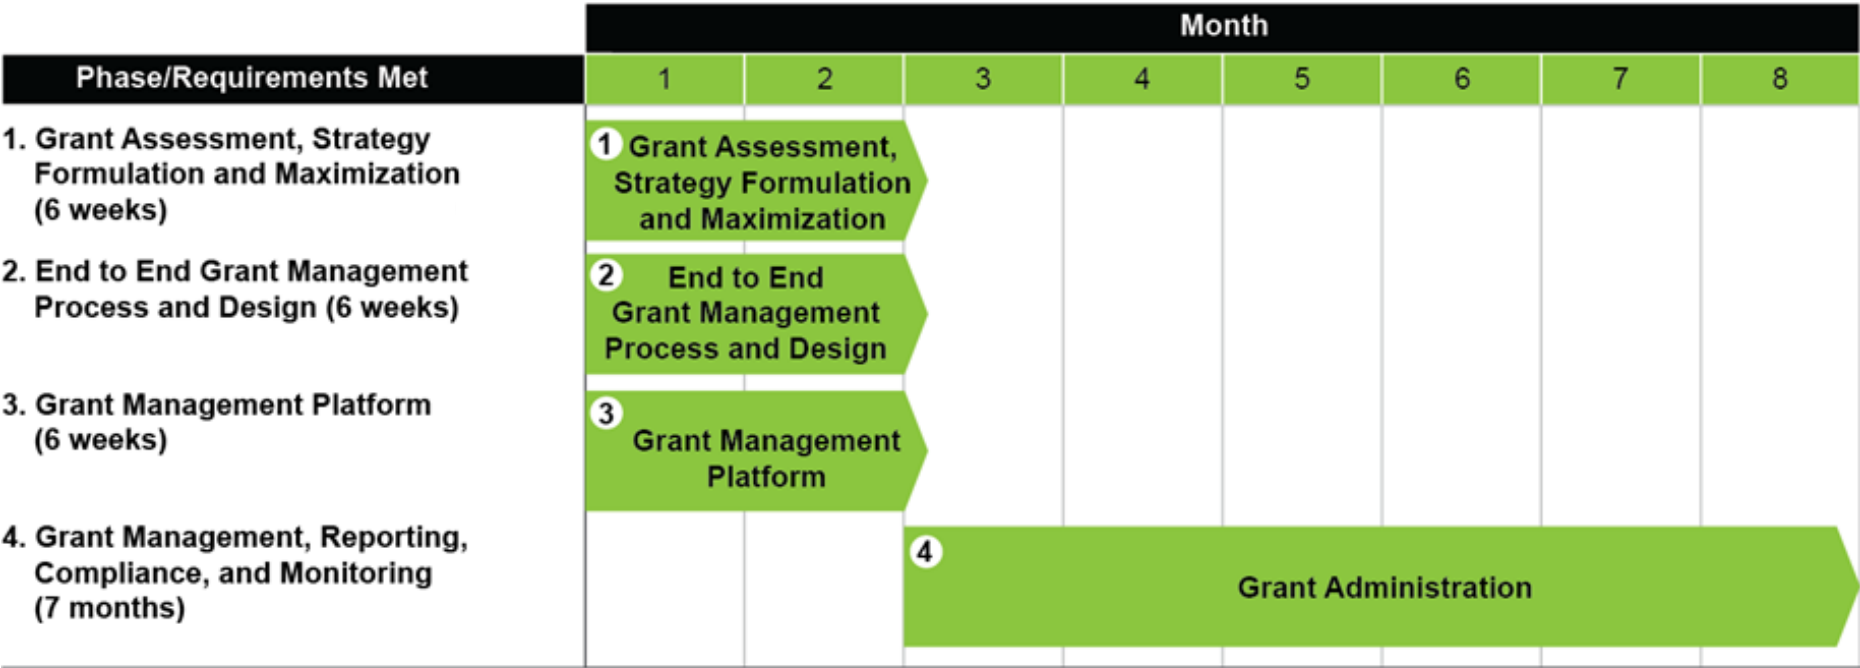

- Guidehouse Inc. was retained by South Carolina to build and operationalize the state-wide recovery programs, provide expertise on reimbursement maximization, conduct compliance and integrity monitoring, and implement a robust expense and document management technology platform.

# Grant management services for South Carolina

Addressing the various requirements sought by the state

- Over the next few months, Guidehouse will focus on the following four workstreams to identify funding and eligibility requirements (to maximize funds, avoid duplications, and coordinate benefits), stand up a Salesforce based grant platform, and administer the CRF grant in a compliant and audit ready manner.

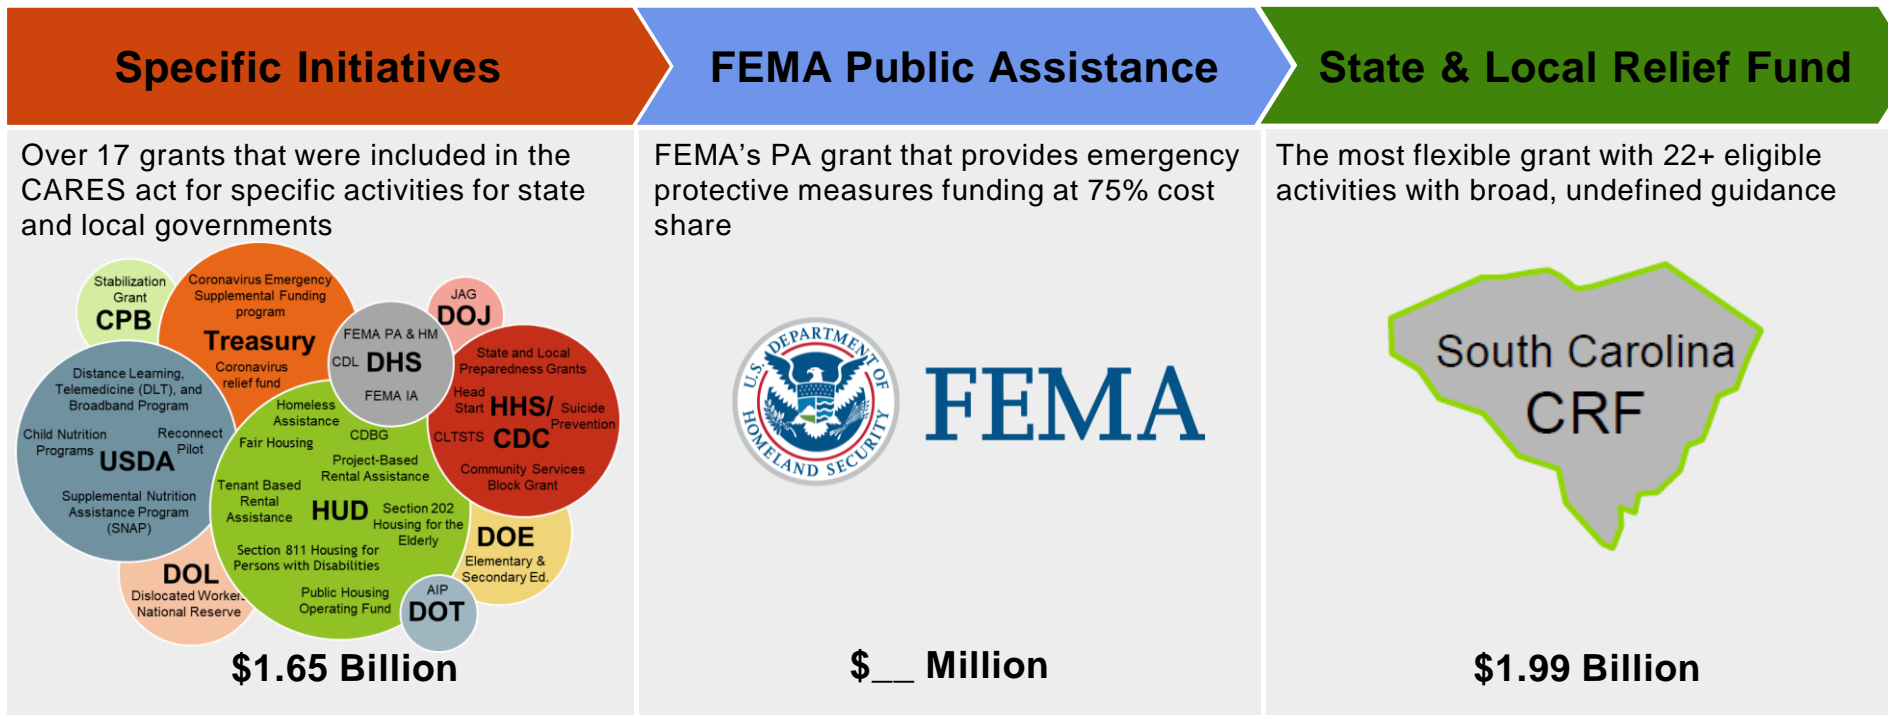

2020-484 State of South Carolina\_009b

# The need to navigate federal grants

Understanding what is available to the state and its communities

- Guidehouse will work with the State to identify the relevant funding opportunities to maximize funding assistance across the diverse portfolio of projects and/or initiatives, while at the same time avoiding duplication of benefits that results in a de-obligation of funds in the future.

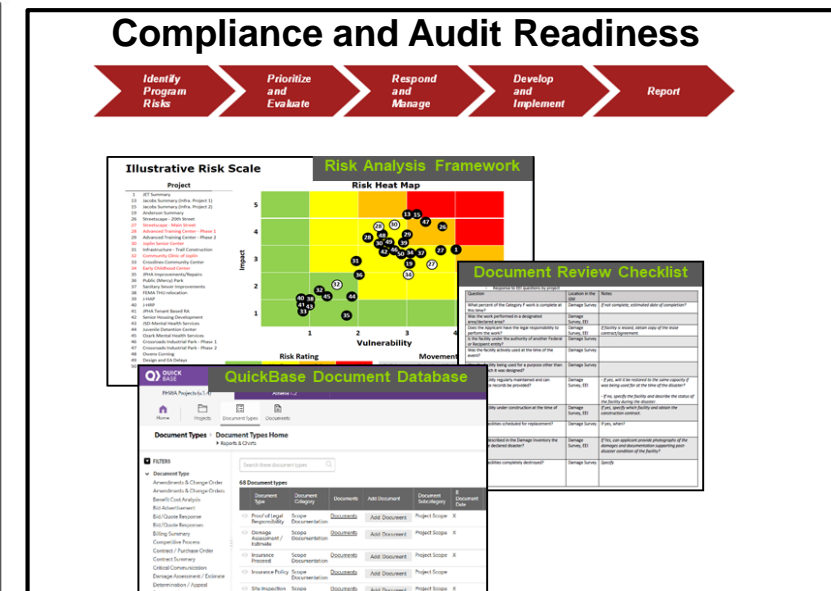

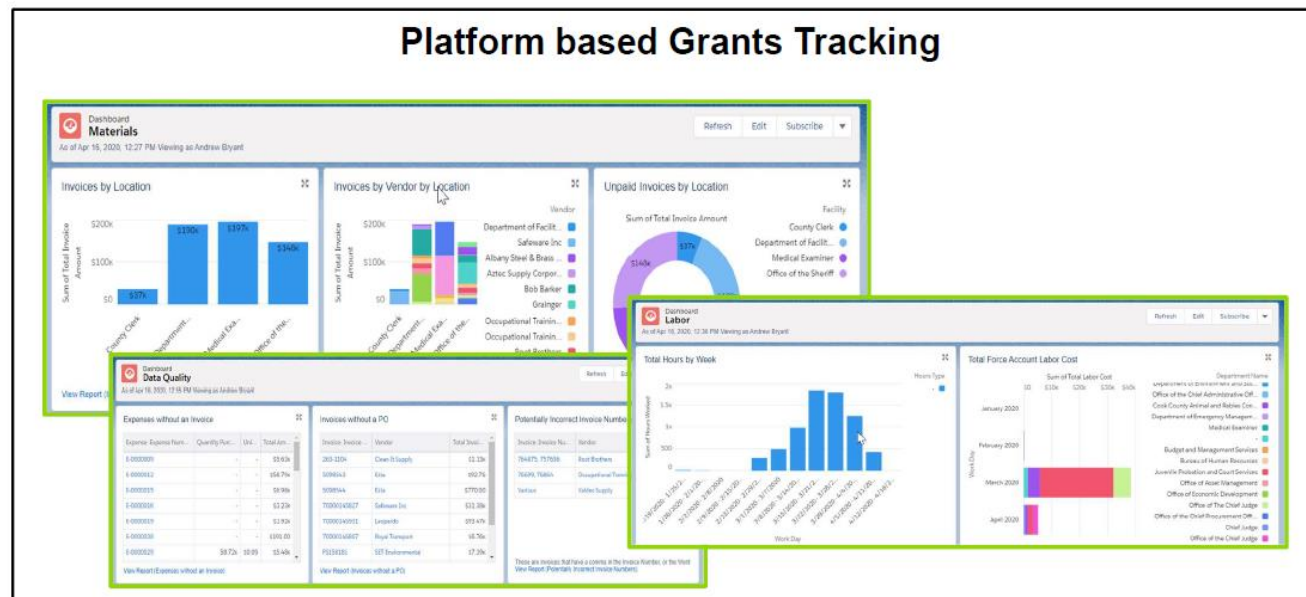

# Efficient grants management administration through Salesforce platform

Providing an end to end platform for management of process while ensuring compliance

- Stand up tried and tested Grant Management Platform to create an efficient and user friendly way to apply for and disperse the funding (from request, processing, distribution to monitoring).
- Accurate, detailed, and thorough documentation, submitted in a timely manner, providing clear and transparent reporting, providing traceability for auditing and fraud prevention in the use of the funding.

# Thank You
